Mars is a cold planet in our solar system. Earth and Jupiter are Mars' neighboring planets. It is half the size of Earth. Mars has been known since ancient times because it can be seen without advanced telescopes. Mars is sometimes called the "Red Planet". Like Earth, Mars has weather. Mars is the fourth planet from the Sun. It has gases of carbon dioxide, nitrogen, and argon. There are signs of ancient floods on Mars, but now water mostly exists in icy dirt and thin clouds. The scientists have the thought that Mars was much wetter and warmer, with a thicker atmosphere, billions of years ago. Scientists want to know test Mars may have had living things in the past. They also want to know if Mars could support life now or in the future.

01 "A review of learning will be like in the future"

life into the future

Before now, the learning process depended on books, blackboards and classrooms. In fact, the process develops all the time, came after that the whiteboard, CDs and DVDs. Next, came the educational programs and the smart boards. Today, we are in the age of online learning. The educational platforms have controlled the learning process.

I think, in the near future, the computer and the robots will develop thinking!

Commuter may choose what suit the mentality and the age of the learner. And they will decide on the quality and the quantity of the curriculum.

A story you won't forget

Once upon a time there was a friend whose name is Gafaar. Gafaar is sixteen years old, but he is very talkative. He claims to know everything about any subject. When a friend of ours says he is ill, Gafaar behaves like a doctor and tells him about the medicine and what he should and should not do! When a friend says he or she has a party. Gafaar tells them about what they should buy and how to celebrate!

The last time Gafaar's talk was about how brave he is. A friend says he has a problem with a street man who always bullies him and his sister and as usual Gafaar told him that he should fight against this

your summer holiday

Last summer, I read an advertisement about a three -day holiday in Sharm ElSheikh. The idea was new because I had never stayed in a hotel before. I booked and set off. In fact, I enjoyed the journey from the very recent time. The hotel was fantastic and the service was very good. The hotel had almost everything you need. Moreover, the city is very beautiful. It has a lot of activities. I enjoyed the sea and the water sports. I went snorkeling and saw the coral reefs.

I also visited Dahab and Ras- Mohamed National Park which has rare kinds of fish.

The one and only disadvantage of this journey was the long distance as the journey took about seven hours but I recommend visiting Sharm El-Sheikh one day.

04 "A review about pollution"

Air pollution /keeping air clean

Man has created a lot of things that benefit him but are harmful to nature. Man is the main reason for destroying nature and making pollution.

Pollution is caused by greenhouse gases such as carbon dioxide. These are made when we burn fossil fuels such as oil.

Also, pollution is created by cutting down trees.

When we cut down trees, the carbon dioxide stays in the air.

The best solution to stop pollution is that we have to depend on cleaner renewable energy such as solar energy and wind power.

We must start recycling more rubbish. Stopping cutting down trees and forests is a must too. If we recycle more paper. We must avoid cutting down our forests.

Finally, both the government and people should encourage planting more trees either in streets or at homes.

"A review of technology"

We couldn't live without satellite technology, if we had not discovered space, we would not have known a lot of the world secrets! Satellites allow us to study the weather all around the world. Lots of people have satellite TV so that they can watch their favourite shows and sports matches. Satellite phones can work anywhere in the world. They help us greatly in places far from cities, such as mountains or deserts. Before Satellite were invented, people had always used maps to find their way. Now most people use GPS. GPS sends signals to receivers earth which work out where we are. We have GPS in cars, on phones and even in some modern motorbike helmets.

I see that we should spend more and more money to explore more and more about space to know a lot of the universe secrets.

"A review of Desertification"

Desertification has become a great problem many countries suffer from and we must find a solution to it. Desertification happens when green land becomes desert. The Great Green Wall is an Initiative set up in 2007 by the African Union to solve the problem of desertification in the Sahel region of Africa, Sahel region suffer from droughts. People do not always farm the land well there. People also grow less amounts of food and lose their homes there.

The Great Green Wall will plant millions of trees and plants across Africa to create a growing green landscape. It is expected that the wall will be the biggest Riving thing in the world, it will create jobs for 10 million people. The trees and plants will improve the land for farming again.

This will help in creating a clean environment and reducing desertification.

07 "A biography of a famous person"

"A review of your hero"

Egypt is rich in her human power and I am always proud of their sons who have become worldwide scientists known all over the world. One of those Egyptians is Dr Farouk El-Baz. He is a great scientist and a geologist. After studying the moon, Farouk started studying deserts on earth. He used satellites to find rivers that were under the sand. This work has helped Egypt and other countries to find new water. He also helped to show astronauts where they could find underground water in the desert. Before this work, he had helped to develop special cameras on the space shuttle.

Scientists had done a lot of research before the first person walked on the moon. Farouk El-Baz helped to plan where Apollo 11 should land on the moon and taught astronauts which rocks to take from the moon.

To sum up, I'd to say such great scientists should be valued and encouraged to help our world more and more!

08 "A review of your dream job"

"A review your future job"

To achieve your goal is to reach your dream job. My dream job is to become a famous writer. From the early age, I loved reading stories and its reviews. Writing is a talent that requires special skills. So I started to take a course during the summer vacation. The year after the course, I joined a writing competition in my school and came the second. After I finish my school, I hope I will join the faculty of Arts and study at press department. My role model is Naguib Mahfouz and I'd like to not only be a writer but a man of literature as well. I hope to win the Nobel Prize of literature one day. At the end, I'd like to say if you have a goal, you must work for it.

"A review on the future "

In the future, driverless car will change all of our lives. We will be able to travel anywhere without touching the control or even looking at the road. Driverless car will also be better for the environment because they will be electric. However, there are still some problems. Car companies will have to do lots of testing to make sure that the cars are completely safe. We will also have to make new laws, and we might even have to change some of our road signs so that the cars computers can read them. Some experts believe that we will have to wait until 2010. Others see that driverless cars will be here much sooner. Of course it's impossible to know who is correct, but we can be sure of one thing driverless cars will be part of our future.

10 "A short story I have read recently"

"A review on your favourite story "

It is a story about horses; their life, their habits and their loyalty. A horse is an animal which can feel and sense like people. Black Beauty is a horse born kind and beautiful. He never kicks or bites even when people make him sad. He treats his owner gently. If there are any dangers on the road, he stops at once to save the lives of his riders. If it is owned by a poor person, he never complains. He may not get enough food and may get ill but he goes on working. Sometimes he travels to long distances and difficult destinations and stays calm. He also may feel pains and there are some bad owners who hit their horses. I think the moral of this story that animals are not machines!

11 "A review of how to be a successful person"

"A review of success "

Success is not given on a silver plate! If you want to be successful person, you have to work for it. There are some points you have to go through if you want to be successful. First, working hard is a golden key making you successful.

A man with no goal is a man with nothing! Second, believing in yourself and having confidence. Self-confidence is an important factor in achieving one's goal. Third, never look at what distract and disturb what you are doing. The best piece of advice is to leave them and go on!

Don't forget that hanging around positive people is also a tool to be successful. Reading and knowledge are weapons to defend yourself against failure.

Finally, I'd like to say that failure is not the opposite of success but it is step to success!

"A review of your favourite job"

Honesty is the main quality in the job of the journalist. The job of a journalist is not an easy one. It needs hard work all around the day. This sometimes requires sleeplessness.

Meeting different people and finding out more about the world is a main part of the job. The job includes spending long time on the Internet and talking to people on the phone too. You have to be interested in the world around you. You also need to be good at listening and writing.

Unfortunately, there are some Journalists who give fake news and report on unreal facts to attract more readers and earn more money. This is a misuse for the job of a journalist.

Finally, I'd like to say that honesty is the most important characteristic that remarks any job!

Egypt has a lot of natural wonders which cannot be seen in other places all over the world. The kharga Oasis is one of Egypt's natural wonders. It is surrounded by desert, far from the River Nile. It is visited by more and more tourists every year.

It is full of date palm trees. These dates can be exported to a lot of other places in addition to selling them in many shops in the local area. Oases in general lie in remote places sometimes it is difficult to be reached especially in extreme weather. People prefer visiting near places to remote ones. If they are visited, it is also difficult to stay in by a few days. There are no many hotels or many houses around oases; simply because oases lie in the desert.
